

Glossaries Language Module: glossaries-portuges

Nicola Talbot

version 1.1 (2015-01-15)

This language module simply needs to be installed. The `glossaries` package will automatically load it if required.

There is currently no maintainer for this module. If you would like to volunteer please contact me at <http://www.dickimaw-books.com/contact.html>

1 The Code

1.1 glossaries-portuges-noenc.ldf

```
1 \@ifpackageloaded{polyglossia}%

```

This is unlikely to occur, since if `polyglossia` has been loaded then the `glossaries-portuges-utf8.ldf` file should've been loaded instead.

1.3 glossaries-portuges.ldf

These translations were provided by a Brazilian Portuguese speaker. I don't know if they're identical to other Portuguese dialects. If they are identical rename `glossaries-dictionary-Brazilian.dict` to `glossaries-dictionary-Portuguese.dict` and remove `glossaries-pt-BR.ldf`. If they're not identical, make the relevant adjustments to `glossaries-portuges-*.ldf` and to `glossaries-pt-BR.ldf` and add `glossaries-dictionary-Portuguese.dict` as appropriate.
